EXPERIENCE

Judi Health (Capital Rx) / Amino Health

Feb 2025 - Present

Principal Software Engineer

- Led a ground-up frontend rebuild from legacy Flask/React 16 to Next.js 15, React 19, Tailwind 4, and shadcn
- Reduced the JS payload from multiple megabytes to under 500 KB, eliminating slow page loads on marginal devices
- Established full test coverage across user journeys with Vitest, Playwright, Turborepo, and pnpm, cutting CI feedback from hours to minutes
- Architected a BFF layer enabling a thin client while keeping backend services decoupled
- Post-acquisition: leading frontend unification across all Judi Care consumer products (54M+ plan members)

GoodRx

Jan 2022 - Feb 2025

Principal Software Engineer

2024 - 2025

- Rebuilt a legacy monolithic frontend (a Next.js 11/Express hybrid) as clean Next.js 13, React 18, and GraphQL
- Designed a new Tailwind and shadcn-based design system
- Led the migration of 1M+ lines of coupled legacy components into a modern monorepo
- Created the `sing` CLI for orchestrating common frontend tasks
- Built a documentation platform that transformed the company's knowledge culture
- Led the core pricing funnel rebuild, aligning three siloed teams and solving multi-year blockers
- Led and organized the Frontend Guild, a community of practice

Engineering Manager

2023, nine months

- Managed the Application Platform Frontend team while continuing architecture contributions
- Deliberately returned to IC, choosing hands-on craft over the management track

Lead (Staff) Software Engineer

2022 - 2023

- Removed 2M+ lines of dead code, cutting build times by more than ten minutes
- Rearchitected CI/CD from Lerna to Turborepo and pnpm, reducing the pipeline from 2+ hours to 15 minutes
- Restructured the monorepo for decoupled contributions
- Transformed the team's reputation from "gatekeepers" to the highest-performing engineering team in 18 months
- Hosted an internal engineering podcast, fostering community and knowledge sharing

Everything But The House

Mar 2021 - Dec 2021

Senior Software Engineer / Frontend Team Lead

- Built a React and Next.js e-commerce platform for estate sales
- Implemented a new design system for consistent, accessible UI
- Built typed utility libraries

American Electric Power

Dec 2019 - Mar 2021

Software Developer

Modernized legacy applications to Lit and Polymer 3. Delivered Oracle Data Analytics Cloud solutions, PHP widgets, and RESTful APIs.

Maydm

Aug 2016 - Nov 2019

Technology Coordinator / Project Manager

One of three employees at a STEM education nonprofit. Built a CS teaching platform (700+ students, 3rd–12th grade), and led operations and technical direction. Later launched the e-commerce site for Pioneer Possibilities, the org's spin-off into physical activity kits for underrepresented students.

Freelance Web Development

2010 - 2015

EDUCATION

Oberlin College

2015

Bachelor of Arts, Computer Science

TOOLKIT

LANGUAGES	TypeScript, HTML, CSS, Python, Odin, Gleam, Rust, SQL
FRAMEWORKS	Svelte, React, Next.js, TanStack, Astro, Tailwind, Datastar
RUNTIMES	Node, Bun, Deno
TOOLING	Turborepo, pnpm, Biome, Playwright, Vite, Nix, Sentry, Grafana, Figma
DATA	Postgres, SQLite, Zero
PLATFORMS	AWS, GCP, Cloudflare
